DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed 01/04/99 has been considered and made of record by the examiner.

Specification

3. The disclosure is objected to because of the following informalities: the words "to have" on page 4 line 13 should be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary

Art Unit: 2682

skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-2, 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshimi (5,603,093) in view of the prior art of figure 11 as admitted by applicant on pages 1-5 of the present specification.

As to claims 1-2, 12-13, Yoshimi discloses an interference wave detecting device wherein when the interference wave is detected in a zone of a base station, the transmission of the base station is stopped so that the interference wave are detected more accurately (see column 1 lines 60-65, column 2 lines 6-12). Yoshimi, however, fails to expressly disclose transmitting means, receiving means as recited in the claim. The admitted prior art discloses an interference wave detecting device which is disposed at a base station and comprises transmitting means and receiving means (see figure 11). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the above teaching of disposing the interference wave detecting device at a base station as taught by the admitted prior art to Yoshimi, in order to reduce the implementing cost as well as system complexity.

Allowable Subject Matter

6. Claims 3-9, 14-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2682

As to claims 3-6, 14-17, the cited prior art fail to disclose causing the transmitting means to stop transmitting the radio signal only when the transmitting means is transmitting one or more continuous null time slots of the radio signal as specified in the claim.

As to claims 7-8, 18-19, the cited prior art fail to disclose detecting an interference wave signal as specified in the claims.

As to claims 9, 20, the cited prior art fail to disclose test signal as specified in the claim.

7. Claims 10-11 are allowed.

As to claim 10, the cited prior art fail to disclose an interference wave detecting device as specified in the claim.
